

CARLOS OCEGUERA

FULL STACK DEVELOPER JR

I am 40 years old and I am from the state of Sinaloa, Mexico. Since 2012, I have been working as a programming teacher. I worked for five years in the culinary field, but I decided to make a radical change in my life and study programming, which I consider my true passion. I am a self-taught person and I enjoy solving problems. I have a high tolerance for pressure, and I like things to be organized. I do not like taking shortcuts; I am always looking for ways to perfect things and procedures to make them more efficient.
